

Claremont Freight Services is very satisfied with the service we received from Jeff Brown and Associates. We would highly recommend his company.

Our business was in need of a technology update to handle our daily workload. Jeff Brown was referred to our company by a respected and reliable source, and who is also a current client of Brown & Associates.

Once we contracted with Jeff, he provided us with strong, viable options that would help us optimize our efficiency, and did so in a timely manner. Jeff made every effort to find us a cost-efficient program and worked on our behalf to hold the vendor to their deadlines. He spent significant time during the implementation process on training and trouble-shooting to insure results. With his knowledge and understanding of operating systems, he was able to translate and teach us the processes involved in utilizing the program.

The results have been rewarding. Daily work is being accomplished more quickly and efficiently. Data is being stored for our use and we have the ability to customize reports for business and our customers. Since implementation, Jeff has continued to follow up to ensure our satisfaction along with offering any additional assistance needed.
